SUMMARY

Web Developer with an MCA, focused on building fast, responsive web applications with HTML5, CSS3, JavaScript, React.js, Next.js, and Tailwind CSS. I have built projects with user authentication, protected pages, REST API integration, and reusable components, and I have deployed them on Vercel. I also work with SQL, MySQL, Git, Power BI, and Python. Looking for an entry-level Web Developer role where I can keep learning and ship useful features.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript, SQL, Python
Web Development: React.js, Next.js, Tailwind CSS, Responsive Web Design, Authentication
Database: MySQL
Tools: Git, GitHub, VS Code, Vercel, Netlify
Other: REST APIs, Power BI, Machine Learning

EXPERIENCE

Operations Executive — Startek May 2025 – Oct 2025

- Maintained strong process accuracy and consistency across operational workflows, applying detail-oriented practices relevant to clean, maintainable code.
- Coordinated with cross-functional teams to resolve issues, building collaboration skills relevant to agile development environments.

Machine Learning Intern (Remote) — CodeAlpha Aug 2024 – Nov 2024

- Cleaned, preprocessed, and validated datasets using Python (Pandas, NumPy), strengthening logical problem-solving skills applicable to web development.
- Built and evaluated ML models remotely, gaining experience with technical workflows, version control, and iterative testing.

PROJECTS

Expense Tracker 2026

Next.js, React.js, Tailwind CSS, Authentication

- Built an expense tracker with complete authentication: sign up, login, logout, and protected routes so users only see their own data.
- Created Dashboard, Expenses, and Add Expense pages with a monthly summary of money spent and money left.
- Added form validation with clear error messages on sign up and login, and redirects after signing in or out.
- Used reusable React components and the map() function to list expenses, keeping the code easy to update.
- Made the app responsive with Tailwind CSS so it works smoothly on mobile, tablet, and desktop.

Portfolio 2026

Next.js, React.js, Tailwind CSS, Framer Motion

- Designed and developed a fully responsive personal portfolio website using Next.js and Tailwind CSS.
- Implemented reusable React components, Framer Motion animations, project showcase, and contact section.
- Deployed the application using Vercel.

Browser Extension Manager 2026

Next.js, React.js, Tailwind CSS

- Built a responsive browser extension manager dashboard using Next.js and Tailwind CSS.
- Implemented reusable React components with dynamic rendering using the map() function for extension cards.
- Added extension filtering (All, Active, Inactive), and interactive UI with responsive design.
- Deployed the application on Vercel and managed the source code using Git and GitHub.

Weather Application 2026

React.js, OpenWeather API

- Integrated the OpenWeather API to provide real-time weather updates.
- Designed a responsive interface displaying temperature, humidity, wind speed, and conditions.

Stock Closing Price Prediction 2024

Python, Machine Learning

- Built a machine learning regression model to predict stock closing prices.
- Performed preprocessing, feature engineering, visualization, and model evaluation using Python.

EDUCATION

Master of Computer Applications (MCA) 2022 – 2024

Maulana Azad National Urdu University | CGPA: 8.13

CERTIFICATIONS

- Full Stack Data Science Pro
